

**ELIVAC™**

## ***PISTON VACUUM PUMPS***

*ELIVAC piston pump has many advantages. It pumps fast and good for both batch process and 7-24 continuous operation; It can run under any pressure between 1.3Pa and ATM; the three eccentric rotor design, precision and superior balance ensured quiet and low vibration running, and therefore, allow higher rpm/pumping speed for smaller weight and footprint; etc.*

*ELIVAC piston pump is widely used in the solar, battery, electronic, coating, packaging, chemical and many more industries. It makes perfect match with ELIVAC roots pumps for larger capacity and higher vacuum.*

## PISTON VACUUM PUMPS

Central vacuum system made by **ELIVAC** piston pump set replaced dozens individual rotary vane pumps that reduced the work place noise level dramatically and made the work area neat.

Model	Unit	ET150	ET300/ET300S*
Flow	m <sup>3</sup> /h(cfm)	255(150)	505(300)
Motor	KW	5.5/7.5	11/15
Speed	rpm	1055	870
Oil Capacity	litter	23	38
Cooling Water @60°F (16°C)	l/m	4	6
Weight - Dry	Kg	364	693
Maximum Gas Ballast Flow	m <sup>3</sup> /h	34	34
Ultimate Pressure	Pa	1.33	1.33
Water Inlet		G1/4"	G3/8"
Water Outlet		G3/8"	G1/2"
Suction		3"ANSI	4"ANSI
Exhaust		2"ANSI	3"ANSI
Noise at 133Pa	db	71	72

\* ET300S has 10%+ pumping speed than ET300 model.
